Notes to the Financial Statements	46

The financial statements of Albaraka Bank Limited have been audited in compliance with S30 of the Companies Act of South Africa. Albaraka Bank Limited's financial manager, Rishaad Bismilla CA(SA), and general manager: finance, Abdullah Ameed CA(SA), were responsible for the preparation of the financial statements.

DIRECTORS' RESPONSIBILITY STATEMENT AND COMPANY SECRETARY STATEMENT

The company's directors are responsible for the preparation and fair presentation of the group annual financial statements and separate parent annual financial statements, comprising the audit committee report, company secretary statement, directors' report, the statement of financial position as at 31 December 2012 and the statement of comprehensive income, the statement of changes in shareholders' equity and statement of cash flows for the year then ended, a summary of significant accounting policies and other explanatory notes, in accordance with International Financial Reporting Standards and in the manner required by the Companies Act of South Africa.

The directors' responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of these financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

The directors' responsibility also includes maintaining adequate accounting records and an effective system of risk management as well as the preparation of the supplementary schedules included in these financial statements.

The directors have made an assessment of the group's and company's ability to continue as a going concern and there is no reason to believe the businesses will not be going concerns in the year ahead.

The auditor is responsible for reporting on whether the group annual financial statements and separate parent annual financial statements are fairly presented in accordance with the applicable financial reporting framework.

Approval of group annual financial statements and annual financial statements
The group annual financial statements and annual financial statements, as set out on pages 34 to 83, were approved by the board of directors on 15 March 2013 and signed on their behalf by:

…………………………..

Adnan Ahmed Yousif
Chairman

…………………………..

Shabir Chohan
Chief executive

Company secretary statement
In terms of the provisions of the Companies Act, I certify that Albaraka Bank Limited has lodged with the Commissioner of the Companies and Intellectual Property Commission all such returns and notices prescribed by the Companies Act, and that all such returns and notices are true, correct and up-to-date.

…………………………..

Colin Breeds
Company secretary
Durban

AUDIT COMMITTEE REPORT

During the financial year ended 31 December 2012, the committee convened five times to discharge both its statutory and board responsibilities. As an overview only, and not to be regarded as an exhaustive list, the committee carried out the following duties:

Annual financial statements

The committee has evaluated the annual financial statements. Amongst others, the committee:

1. Reviewed the principles, policies and accounting practices and standards adopted in preparation of the annual financial statements and commented thereon and monitored compliance with all statutory/legal/regulatory requirements; and
2. Reviewed interim reports and preliminary results announcements.

Since the annual financial statements complied, in all material aspects, with the principles, policies and accounting practices and standards adopted in the preparation of the annual financial statements and with the appropriate International Financial Reporting Standards and as no complaints relating to the accounting practices or the contents or auditing of the financial statements, or to any related matter, were received by the committee, the committee has approved and recommended the annual financial statements for approval to the board. The board has subsequently approved the financial statements, which will be presented to shareholders at the annual general meeting to be held on 21 June 2013.

Internal audit function

The committee has played an oversight role in respect of the internal audit function, which is performed in-house to ensure its effectiveness. Amongst others, the committee:

- Approved the internal audit mandate and ensured that internal audit is an effective risk-based function that adheres to the Institute of Internal Auditors Standards and Code of Ethics;
- Ensured that the internal audit plan was risk-based and addressed specific risks of the company;
- Approved the internal audit plan;
- Ensured that the charter used by internal audit was approved by the board;
- Reviewed the internal audit charter;
- Regularly met separately with the internal audit manager; and
- Did not receive any complaints relating to the internal audit of the company.

External audit and related matters

Ernst & Young Inc. (EY) are the company's appointed external auditors. The committee has played an oversight role in respect of the external audit process to ensure its effectiveness. Amongst others, the committee:

- Approved EY's terms of engagement;
- Reviewed the quality and effectiveness of the external audit process;
- Reviewed the external auditor's report to the committee and management's responses thereto;
- Reviewed significant judgements and/or unadjusted differences resulting from the audit, as well as any reporting decisions made;
- Maintained a non-audit services policy which determines the nature and extent of any non-audit services that EY may provide to the company/group;
- Regularly met separately in confidence with EY;
- Through enquiry, ascertained that EY has not identified any irregularity that required reporting thereof to IRBA; and
- Evaluated and were satisfied with the independence of EY.

Risk management, assurance and ethics

The committee formed an integral component of the risk management framework and amongst others, monitored financial reporting risks, internal financial controls, fraud risks and IT risks as these relate to financial reporting. The committee played an oversight role in respect of risk, combined assurance and ethics.

Chairman: audit committee

INDEPENDENT AUDITOR'S REPORT

Report on the consolidated financial statements
We have audited the consolidated and separate financial statements of Albaraka Bank Limited set out on pages 34 to 83, which comprise the directors' report, statements of financial position as at 31 December 2012, and the statements of comprehensive income, statements of changes in equity and statements of cash flows for the year then ended, and the notes, comprising a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the financial statements
The company's directors are responsible for the preparation and fair presentation of these consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility
Our responsibility is to express an opinion on these consolidated and separate financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated and separate financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of Albaraka Bank Limited as at 31 December 2012, and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards, and the requirements of the Companies Act of South Africa.

Other reports required by the Companies Act
As part of our audit of the consolidated and separate financial statements for the year ended 31 December 2012, we have read the Audit Committee's Report and the Company Secretary's Certificate for the purpose of identifying whether there are material inconsistencies between these reports and the audited consolidated and separate financial statements. These reports are the responsibility of the respective preparers. Based on reading these reports we have not identified material inconsistencies between these reports and the audited consolidated and separate financial statements. However, we have not audited these reports and accordingly do not express an opinion on these reports.

DIRECTORS' REPORT FOR THE YEAR ENDED 31 DECEMBER 2012

The directors have pleasure in presenting their report for the year ended 31 December 2012.

Nature of the business
Albaraka Bank Limited is a registered bank domiciled in South Africa and has as its principal objective the operation of its business according to Islamic banking precepts. The bank serves the public through branches in Athlone (Cape Town), Fordsburg (Johannesburg), Killarney (Johannesburg), Laudium (Pretoria), Lenasia (Johannesburg), Kingsmead (Durban), Overport (Durban),Port Elizabeth and corporate offices in Cape Town, Durban, and Johannesburg.

The bank's parent and ultimate holding company is Al Baraka Banking Group B.S.C., a company incorporated in the Kingdom of Bahrain. The address of its registered office is PO Box 1882, Manama, Kingdom of Bahrain.

Share capital
The authorised share capital of the company comprises 30,0 million (2011: 30,0 million) ordinary shares of R10 each amounting to R300,0 million (2011: R300,0 million). The issued share capital of the company comprises 22,5 million (2011: 22,5 million) ordinary shares of R10 each amounting to R225,0 million (2011: R225,0 million).

Financial results
The results of the group and the company for the year ended 31 December 2012 are set out on pages 36 to 83.

Group structure
Albaraka Properties Proprietary Limited is a wholly-owned subsidiary of Albaraka Bank Limited.

On 27 October 2011, the board of directors of Albaraka Properties Proprietary Limited resolved to deregister Albaraka Properties Proprietary Limited and, therefore, classified it as a disposal group held for distribution. The residual assets were intended to be distributed to the holding company, Albaraka Bank Limited, in terms of Section 47 of the Income Tax Act, Section 8(25) of the VAT Act and Section 9(1)(l)(iii) of the Transfer Duties Act.

During the 2012 financial year further information came to light which caused the board of directors to reconsider and rescind their decision to dissolve Albaraka Properties Proprietary Limited. The initial benefits envisaged were outweighed by new costs identified with implementing the structure. On 14 September 2012 the board of directors resolved not to proceed with the dissolution and thus reverse its decision taken on 27 October 2011. Based on this decision, Albaraka Properties Proprietary Limited is no longer classified as a disposal group held for distribution to its owners and is disclosed as a going concern in its separate financial statements. As a result of the above, Albaraka Properties Proprietary Limited remains a fully consolidated subsidiary of Albaraka Bank Limited and is treated accordingly for purposes of the group financial statements.

Dividends
On 16 March 2012 the directors declared a dividend of 45 cents (2011: 45 cents) per share amounting to R10,13 million (2011: R6,75 million) paid to shareholders registered as at close of business on 08 June 2012.

Events after the reporting period
On 15 March 2013 the directors declared a dividend of 45 cents (2012: 45 cents) per share amounting to R10,13 million (2012: R10,13 million) payable on 18 October 2013 to shareholders registered as at close of business on 04 October 2013.

Directors
The directors of the company during the year under review were:

Non-executive
AA Yousif, Chairman, Bahraini
OA Suleiman, Sudanese **
MG McLean

Independent non-executive
SA Randeree, Vice chairman, British*
F Kassim, Sri Lankan
A Lambat, CA (SA)
Adv. AB Mahomed SC
MS Paruk, CA (SA)
YM Paruk
M Youssef Baker, Egyptian

Executive
SAE Chohan, CA (SA), Chief executive
MJD Courtiade, CA (SA), Financial director, French

** Retired on 1 January 2012

* Independent from 16 March 2012

Secretary
The secretary of the company is CT Breeds whose business, postal and registered addresses are as follows:

1. Reporting entity

Albaraka Bank Limited is a company domiciled in South Africa. The company's registered address is 2 Kingsmead Boulevard, Kingsmead Office Park, Stalwart Simelane Street (Stanger Street), Durban, 4001. The consolidated financial statements of the company for the year ended 31 December 2012 comprise the company and its subsidiary (together referred to as the "group"). The accounting policies below are applicable to both the company and group financial statements.

The group is primarily involved in corporate and retail banking according to Islamic banking precepts.

2. Basis of preparation

Statement of compliance

The consolidated financial statements have been prepared in accordance with, and comply with the South African Companies Act and International Financial Reporting Standards (IFRS) and its interpretations adopted by the International Accounting Standards Board.

Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for fair-value-through-profit-or-loss financial assets which are measured at fair value.

Functional and presentation currency

These consolidated financial statements are presented in South African Rand which is the company's functional currency. All financial information is presented in South African Rand.

Use of significant estimates and judgements

The preparation of the group and company financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent liabilities, at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

The key assumptions concerning the future and other key sources of uncertainty, at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

In determining the rate intrinsic in finance leases, the company estimates any unguaranteed residual value which may be realised at the end of the lease. This unguaranteed residual is compared to the fair value of the underlying asset independently valued on a regular basis.

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised.

In determining the extent to which the deferred tax assets may be recognised, management considers factors, such as the likely period of future operations, estimated profits which are adjusted for exceptional items and estimated taxable profits based on the applicable legislation, as well as future tax planning strategies.

In determining the useful lives of property and equipment, management has exercised judgement as further detailed in accounting policy 4, Property and equipment.

The impairment on advances comprises a specific impairment and portfolio impairment. The specific impairment is calculated by considering all loans that are categorised as bad (greater than 90 days in arrears). Each advance is then scrutinised to determine whether impairment is required by assessing the cash flow being received on the advance. In calculating the impairment against the individual advance the following assumptions were made:

1. A constant cash flow would be received based on the recent payment history;
2. The cash flow would be received for a period that was sufficient to repay the outstanding advance amount; and
3. The discount rate used is equivalent to the mark-up profit rate on the advance.

Where the expected payment is inadequate, the bank factors in the realisation of tangible collateral on hand to settle the exposure. The difference between the realisation value and the value of the exposure may result in a specific impairment.

The portfolio impairment is calculated based on the historical trend of deterioration in the book from good to bad. The average deterioration of the book over the past 10 years has been used as the basis for providing the portfolio impairment.

Management considers external economic and other indicators for their impact on the advances book and consequently the portfolio impairment. Another factor that is considered during this process and which requires management judgement applies to the weighting of security cover per product type.

3. **Basis of consolidation**

Investment in subsidiary

Subsidiaries are entities controlled by the bank. Control exists when the bank has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable or convertible are taken into account.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Investment in subsidiary is carried at cost less accumulated impairment in the separate company financial statements.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

4. **Property and equipment**

Land is not depreciated. Items of equipment are stated at cost less accumulated depreciation and impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset. Equipment, motor vehicles, buildings, tank containers, computer software and hardware, and leasehold improvements are depreciated on a straight line basis.

The re-assessed estimated useful lives are as follows:

Buildings – Owned	50 years
Buildings – Leased	15 years
Tank containers	20 years
Equipment	4 - 26 years
Vehicles	7 - 10 years
Computer hardware	2 - 18 years
Leasehold improvements	4 - 24 years

The assets' depreciation methods, residual values and useful lives are reviewed and adjusted if appropriate, at each reporting date. Management has exercised judgement in determining useful lives and residual values of each category of property and equipment as required by International Accounting Standard (IAS) 16 - Property, plant and equipment.

These judgements have been based on historical trends and the expected future economic benefits to be derived from the assets. When parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

Subsequent expenditure relating to an item of property and equipment is capitalised when it is probable that future economic benefits from the use of the asset will be increased. All other subsequent expenditure is recognised as an expense in the period in which it is incurred.

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit for the year in the statement of comprehensive income in the year that the asset is derecognised.

5. **Impairment of non-financial assets**

The carrying amounts of the group's non-financial assets other than deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If there is any indication that an asset may be impaired, its recoverable amount is estimated.

A cash-generating unit is the smallest identifiable asset group that generates cash flows that are independent from other assets and groups. In assessing value in use, the expected future cash flows from the asset are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss is recognised in profit for the year in the statement of comprehensive income whenever the carrying amount of the asset or its cash-generating unit exceeds its recoverable amount. The recoverable amount is the higher of its net selling price and its value in use.

A previously recognised impairment loss is reversed if the recoverable amount increases as a result of a change in the estimates used to determine the recoverable amount, but not to an amount higher than the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognised in prior years. For goodwill, a recognised impairment loss is not reversed.

6. **Provisions**

Provisions are recognised when the group has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to any provision is presented in profit for the year in the statement of comprehensive income net of any reimbursement.

7. **Contingencies and commitments**

Transactions are classified as contingencies where the group's obligations depend on uncertain future events and principally consist of third party obligations underwritten by the bank. Items are classified as commitments where the group commits itself to future transactions that will normally result in the acquisition of an asset.

8. Financial instruments

Non-derivative financial instruments

Non-derivative financial instruments comprise investments in equity and debt securities, advances and other receivables, cash and cash equivalents, loans and borrowings, and accounts payable. A financial instrument is initially recognised when the group becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the group's contractual rights to the cash flows from the financial assets expire or if the group transfers the financial assets to another party without retaining control or substantially all the risks and rewards of the assets. Purchases and sales of financial assets are accounted for at trade date, i.e., the date that the group commits itself to purchase or sell the assets. Financial liabilities are derecognised if the group's obligations specified in the contract expire or are discharged or cancelled.

The classification of financial instruments at initial recognition depends on the purpose for which the financial instruments were acquired and their characteristics. All financial instruments are initially recognised at their fair value plus, in the case of financial assets and liabilities not at fair-value-through-profit-or-loss, any directly attributable incremental costs of acquisition or issue.

Available-for-sale financial assets

Available–for–sale investments include equity and debt securities. Equity investments classified as available-for-sale are those which are neither classified as held–for–trading nor designated at fair value through profit or loss. The group's investment in available-for-sale financial assets are stated at cost due to the unavailability of observable market data that is required to measure these investments at fair value.

Fair-value-through-profit-or-loss financial instruments

Financial assets and financial liabilities classified in this category are those that have been designated as such by management on initial recognition. Financial assets and financial liabilities at fair-value-through-profit-or-loss are recorded in the statement of financial position at fair value. Changes in fair value are recorded in profit for the year in the statement of comprehensive income.

Advances and other receivables

Advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the group does not intend to sell immediately or in the near term.

Advances are initially measured at fair value plus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective profit rate (EPR) method except when the group designates the advances at fair-value-through-profit-or-loss. Amortised cost is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EPR. The losses arising from impairment are recognised in profit for the year in the statement of comprehensive income.

Offsetting

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the group has a legal right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously. Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions.

Investment securities

Investment securities are initially measured at fair value plus incremental direct transaction costs and subsequently accounted for as fair-value-through-profit-or-loss financial instruments or available-for-sale financial instruments. Dividend income is recognised in profit or loss when the group becomes entitled to the dividend.

Fair value measurement

The determination of fair values of financial assets and financial liabilities is based on quoted market prices or dealer quotations for financial instruments traded in active markets. For all other financial instruments fair value is determined by using valuation techniques which include net present value techniques, the discounted cash flow method, comparison to similar instruments for which market observable prices exist and valuation models. The group uses widely recognised valuation models for determining fair value of common and more simple financial instruments where inputs into models are market observable.

For more complex instruments, the group uses proprietary models which are usually developed from recognised valuation models. Some or all of the inputs into these models may not be market observable and are derived from market prices, rates or are estimated based on assumptions. When entering into a transaction, the financial instrument is recognised initially at the transaction price, which is the best indicator of fair value, although the value obtained from the valuation model may differ from the transaction price. This initial difference, usually an increase in fair value indicated by valuation techniques is recognised in profit for the year depending upon the individual facts and circumstances of each transaction and not later than when the market data becomes observable. The group complies with International Accounting Standard (IAS) 39 - Financial instruments: Recognition and measurement, and day one gains are immaterial to the operations of the group.

The value produced by a model or other valuation technique is adjusted to allow for a number of factors as appropriate, because valuation techniques cannot appropriately reflect all factors market participants take into account when entering into a transaction. Valuation adjustments are recorded to allow for model risks, liquidity risks as well as other factors. These adjustments are necessary and appropriate to fairly state financial instruments carried at fair value on the statement of financial position.

Non-derivative financial liabilities
Fair value, which is determined for disclosure purposes, is calculated based on the present value of future cash flows, discounted at the market rates at the reporting date. After initial measurement, financial liabilities are measured at amortised cost using the effective profit rate method.

Guarantees
In the ordinary course of business, the bank issues guarantees, consisting of letters of credit, letters of guarantees and confirmations. These guarantees are recognised as off-balance sheet items which are measured at fair value upon initial recognition and are not re-measured subsequently.

9. Impairment of financial assets
At each reporting date the group assesses whether there is objective evidence that financial assets not carried at fair-value-through-profit-or-loss are impaired. Financial assets are impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset and that the loss event has an impact on the future cash flows on the asset that can be estimated reliably. The group considers evidence of impairment at both a specific asset and collective level. All individually significant financial assets are assessed for specific impairment. All significant financial assets or cash-generating units found not to be specifically impaired are then collectively assessed for any impairment that has been incurred, but not yet identified.

Financial assets or cash-generating units that are not individually significant are then collectively assessed for impairment by grouping together financial assets with similar characteristics. In respect of advances refer to note 2 for use of estimates and judgements.

Objective evidence that financial assets (including equity securities) are impaired can include default or delinquency by a debtor, restructuring of an advance by the group on terms that the group would otherwise not consider, indications that a debtor or issuer will enter bankruptcy, the disappearance of an active market for a security, other observable data relating to a group of assets, such as adverse changes in the payment status of debtors, or issuers in the group or economic conditions that correlate with defaults in the group. Advances are stated after the deduction of specific and portfolio impairments.

Specific impairments represent the quantification of incurred losses from separately identified non-performing advances. The amount of specific impairment raised is the amount needed to reduce the carrying value of the asset to the expected ultimate net realisable value, taking into account the financial status of the underlying client and any security in place for the advances.

The impairment is raised through an allowance account and the amount of the loss is recognised in profit for the year in the statement of comprehensive income. In assessing the net realisable value, the expected future cash flows from advances are discounted to their present value at their original effective mark-ups.

Portfolio impairments cover losses which, although not specifically identified, are present in any portfolio of advances. The movements in provisions are recognised in profit for the year in the statement of comprehensive income.

10. Income tax expense
Income tax expense on the profit or loss for the year comprises current and deferred tax. Income tax is recognised in profit for the year except to the extent that it relates to items recognised directly in other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using the tax rates enacted or substantively enacted at the reporting date, and any adjustment of tax payable for previous years.

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognised for all taxable temporary differences, except:
- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- In respect of taxable temporary differences associated with investments in subsidiaries and associates, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised except:
- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- In respect of deductible temporary differences associated with investments in subsidiaries and associates, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred

tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

11. Revenue recognition

Income from Islamic activities

Income from Islamic activities comprises:

- Income earned from advances being profits attributable to the purchase and sale of moveable and immoveable property, manufacturing materials and finished products in terms of Musharaka or Murabaha arrangements. The profit is recognised over the period of each transaction either on the straight line or reducing balance basis, depending on the nature of the transaction;
- Income earned from equity finance transactions being profits attributable to the purchase and sale of equities in terms of Murabaha arrangements. The profit is recognised over the period of each transaction on the straight line basis;
- Fee and commission income for services rendered to customers. The income is recognised when earned; and
- Other operating income relating mainly to rental income earned on properties and tank containers. Rental income is recognised in profit or loss on a straight line basis over the lease term for properties.

Non-Islamic income

The group does not, as a policy, engage in any activities that involve usury. However, any non-Islamic income earned by the company, due to circumstances beyond its control, is transferred to the welfare and charitable fund. Fair value gains and losses on treasury bills are regarded as non-Islamic income and are therefore transferred to the welfare and charitable fund net of tax. Non-Islamic income is reported net of these transfers on the face of the statement of comprehensive income.

Dividend income

Dividends are recognised when the right to receive payment is established.

12. Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date, whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

Group and company as a lessee

Finance leases, which transfer to the group substantially all the risks and benefits incidental to ownership of the leased item, are capitalised at the commencement of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance costs and reduction of the lease liability so as to achieve a constant rate of return on the remaining balance of the liability. Finance costs are recognised in profit for the year in the statement of comprehensive income.

Leased assets are depreciated over the useful life of the asset. However, if there is no reasonable certainty that the group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term. Operating lease payments are recognised as an expense in the statement of comprehensive income on a straight line basis over the lease term. When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which termination takes place.

Group as a lessor

Leases where the group does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rentals are recognised as revenue in the period in which they are earned.

13. Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise short-term negotiable securities, cash and short-term funds.

14. Investment properties

Investment properties are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, investment properties are carried at cost less accumulated depreciation and accumulated impairment losses.

Investment properties are derecognised when either they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in profit or loss in the year of retirement or disposal.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner-occupied property, the transfer is recorded at the carrying value of the property. If owner-occupied property becomes an investment property, the company accounts for such property in accordance with the policy stated under property and equipment up to the date of change in use.

No assets held under operating leases have been classified as investment properties.

15. Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and expenditure is reflected in profit and loss in the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset is accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates.

The amortisation expense on intangible assets with finite lives is recognised in the statement of comprehensive income in the expense category consistent with the function of the intangible assets.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit and loss when the asset is derecognised.

Research and development costs

Research costs are expensed as incurred. Development expenditures, on an individual project, are recognised as an intangible asset when the group can demonstrate:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- Its intention to complete and its ability to use or sell the asset;
- How the asset will generate future economic benefits;
- The availability of resources to complete the asset; and
- The ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation is recorded in profit and loss. During the period of development, the asset is tested for impairment annually.

Intangible assets are amortised on a straight line basis. The current estimated useful lives are as follows:

Computer software	3 – 7 years
Capitalised project costs	5 – 10 years

Computer software comprises acquired third party software and capitalised project costs represent internally generated costs.

16. Employee benefits

Defined contribution plan

Obligations for contribution to defined contribution pension plans are recognised as an expense in profit for the year in the statement of comprehensive income as incurred.

Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related time of service is provided.

17. Earnings per share

The group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the bank by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

18. Related parties

A party is related to the company if any of the following are met:

- Directly, or indirectly through one or more intermediaries, the party controls, is controlled by or is under common control with the company;
- It is a joint venture or an associate;
- The party is a member of the key management personnel of the entity or its parent; and
- The party is a close member of the family of any individual referred to above.

Close member of the family of an individual includes:

- The individual's domestic partner and children;
- Children of the individual's domestic partner; and
- Dependents of the individual or the individual's domestic partner.

1. Capital Adequacy

Introduction
Albaraka Bank Limited is a registered bank domiciled in South Africa and is subject to regulatory capital adequacy requirements under Basel II in terms of the Banks Act, No. 94 of 1990, as amended and Regulations relating thereto.

The bank has a wholly-owned subsidiary, which is a property owning company. The subsidiary is consolidated for accounting purposes and group annual financial statements are prepared annually. The subsidiary is consolidated for regulatory purposes in accordance with Regulation 36(2) of the Banks Act and Regulations.

Funds owned by the bank are subject to South African Exchange Control Regulations.

Capital structure
The capital base of the bank provides the foundation for financing, off-balance sheet transactions and other activities. The capital adequacy of the bank is measured in terms of the Banks Act, which dictates the requirements on how the bank must maintain a minimum level of capital based on its risk adjusted assets and off-balance sheet exposures, as determined by the provisions of Basel II. The capital structure of the bank is as follows:

	2012	2011
	R'000	R'000
Regulatory capital		
Tier 1		
Share capital	**225 000**	225 000
Share premium	**29 866**	29 866
Retained income	**106 011**	81 043
Less: Unappropriated profits	**(8 322)**	(596)
Total capital & reserves	**352 555**	335 313
Less: Prescribed deductions against capital and reserve funds	**(19 570)**	(19 007)
Total Tier 1 capital	**332 985**	316 306
Tier 2		
Portfolio impairment (net of deferred tax)	**7 779**	7 201
Total eligible capital	**340 764**	323 507
Capital adequacy ratios (Tier 1 %)	**12,16%**	12,81%
Capital adequacy ratios (Total %)	**12,44%**	13,10%
Minimum regulatory requirement ratios (Total %)	**9,50%**	9,50%

The bank's capital strategy plays an important role in growing shareholder value, and has contributed significantly to growth in the current year. The objective of active capital management is to:

- Enable growth in shareholder value; and
- Protect the capital base.

The bank's risk and capital management committee is responsible for the formulation, implementation and maintenance of the bank's capital management framework in order to achieve the above objectives and operates in terms of a board-approved capital management framework. It assists the board in reviewing the bank's capital requirements and management thereof.

The bank is committed to maintaining sound capital and strong liquidity ratios. The overall capital needs are continually reviewed to ensure that its capital base appropriately supports current and planned business and regulatory capital requirements.

In assessing the adequacy of the bank's capital to support current and future activities, the group considers a number of factors, including:

- An assessment of growth prospects;
- Current and potential risk exposures across all the major risk types;
- Sensitivity analysis of growth assumptions;
- The ability of the bank to raise capital; and
- Peer group analysis.

At 31 December 2012, the minimum capital requirements and risk-weighted assets of the bank for credit risk, equity risk, market risk and other risks as calculated under the standardised approach and for operational risk as calculated under the basic indicator approach in terms of the Banks Act and Regulations were as follows:

	Capital requirements		**Risk-weighted assets**	
	2012	2011	**2012**	2011
	R'000	R'000	**R'000**	R'000
Credit risk	**227 834**	201 097	**2 398 252**	2 116 811
Operational risk	**20 697**	18 887	**217 866**	198 811
Equity risk	**-**	2 149	**-**	22 621
Market risk	**177**	1 610	**1 860**	16 950
Other risk	**11 520**	10 831	**121 258**	114 012
	260 228	234 574	**2 739 236**	2 469 205

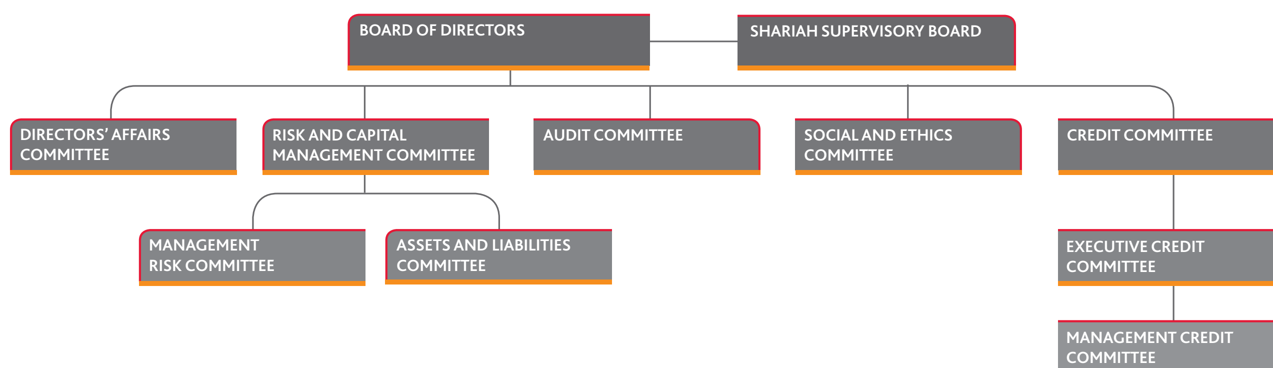
2. Risk management and assessment

Whilst the board is ultimately responsible for risk management and to determine the type and level of risk which the bank is willing to accept in conducting its banking activities, the effective management of risk has been delegated to five board committees, namely, the risk and capital management committee, the audit committee, the credit committee, the directors' affairs committee and the social and ethics committee. These committees are assisted by management committees (more particularly the assets and liabilities committee, the executive credit committee, the management risk committee) to discharge their responsibilities effectively. The composition, terms of reference and delegated powers of authority of the board and management committees are set by the board and are reviewed annually.

The board and management committees are responsible for developing and monitoring risk management policies and programmes in their specified areas. These policies and programmes are established to identify and analyse risks faced by the bank, to set appropriate risk limits and controls and to monitor risks and adherence to limits. The risk management policies and programmes are reviewed regularly to reflect changes in market conditions and products offered. In addition, the bank has adopted a strategy that seeks to entrench at all levels within Al Baraka Bank a culture that is risk-management orientated.

2. Risk management and assessment (continued)

The structure and organisation of the risk management function is provided in diagrammatic form below:



The audit committee and risk and capital management committee are responsible for monitoring compliance with the risk management policies and programmes and for reviewing the adequacy of the risk management framework in relation to the risks faced by the bank. The audit committee is assisted in these functions by internal audit which undertakes regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the audit committee.

The following are the major forms of risks to which the bank is exposed:
- Credit risk;
- Market risk;
- Equity risk;
- Liquidity risk;
- Profit rate risk;
- Shariah risk;
- Operational risk;
- Compliance risk; and
- Other risk.

2.1 Credit risk
Credit risk refers to the potential loss that the bank could sustain as a result of counter-party default and arises principally from advances to customers and other banks. The bank manages its credit risk within a governance structure supported by delegated powers of authority as approved by the board. The credit approval process is graduated, whereby increasingly higher levels of authorisation are required depending on the type and value of the transactions concerned. Applications for credit may therefore be considered progressively by line management, senior and executive management, the management credit committee, the executive credit committee, the board credit committee and the board itself.

A separate credit division, reporting to the chief executive and the credit committee of the board, is responsible for the oversight of the bank's credit risk, including:
- Formulating credit policies covering collateral requirements, credit assessment, risk grading and reporting, documentary and legal procedures and compliance with regulatory and statutory requirements;
- Establishing the authorisation structure for the approval and renewal of credit facilities;
- Reviewing and assessing credit risk;
- Limiting concentrations of exposure to counterparties and by product; and
- Developing and maintaining risk gradings in order to categorise exposures to the degree of risk of financial loss faced and to focus management on the relevant risks. The risk grading system is used in determining where impairment provisions may be required against specific credit exposures. The current risk grading framework is described under the section dealing with portfolio measures of risk.

Credit exposures are monitored primarily on performance. Defaulting accounts receive prompt attention. Initially they are dealt with by line management and, in instances where further degeneration occurs, they are handed over to the bank's collections and legal specialists.

Depending on the type of credit exposure, account reviews, which include the re-performance of qualitative and quantitative assessments, are performed annually.

The credit risk management process needs to identify all risk factors to enable such risks to be quantified and their impact on the pricing or credit risk to be taken into account. Pricing for credit risk is, therefore, a critical component of the risk management process. The main risk of default by the counter-party is mitigated by means of collateral security obtained from the debtor concerned.

For internal risk management and risk control purposes, credit risk is measured in terms of potential loss that could be suffered, taking into account the quantum of the exposures, the realisable value of the collateral security and the value, if any, that could be placed on the sureties.

The executive and board credit committees constantly monitor the credit quality of counter-parties and the exposure to them. Detailed risk reports are submitted to the aforementioned committees and also to the management credit committee on a regular basis.

Portfolio measures of credit risk
Credit loss expense is reported in accordance with International Accounting Standard (IAS) 39 Financial instruments: Recognition and measurement. Under these rules, losses are recognised and charged to the profit for the year in the statement of comprehensive income in the period in which they arise.

The occurrence of actual credit losses is erratic in both timing and amount and those that arise usually relate to transactions entered into in previous accounting periods. In order to make the business accountable for any credit losses suffered in a portfolio of advances that have not yet been individually identified as impaired, a credit impairment for incurred, but not reported losses, is created based on historic loss and estimated emergence patterns. Based on the performance of individual customers and the results of assessments performed, credit exposures are classified under five main categories, or risk gradings, which are Standard, Special Mention, Sub-standard, Doubtful and Loss.

- Exposures that are current and where full repayment of the principal and profit is expected are classified under the Standard category;
- Exposures where evidence exists that the debtor is experiencing some difficulties that may threaten the bank’s position, but where ultimate loss is not expected - but could occur if adverse conditions continue - are classified under the Special Mention category;
- Exposures that show underlying, well-defined weaknesses that could lead to probable loss if not corrected are classified under the Sub-standard category. The risk that such exposures may become impaired is probable and the bank relies to a large extent on available security;
- Exposures that are considered to be impaired, but are not yet considered total losses because of some pending factors that may strengthen the quality of such exposures are classified under the Doubtful category;
- Exposures that are considered to be uncollectable and where the realisation of collateral and institution of legal proceedings have been unsuccessful are classified under the Loss category. These exposures are considered to be of such little value that they should no longer be included in the net assets of the bank;
- Exposures that are classified under the Sub-standard, Doubtful and Loss categories are regarded as non-performing; and
- Exposures that have not met their individual repayment terms are classified as past due exposures.

A default is considered to have occurred with regard to a particular obligor when either of the following events have taken place:
- The bank considers that the obligor is unlikely to pay its credit obligations to the bank, without recourse by the bank to actions such as realising security (if held); and
- The obligor is past due more than 90 days on any material credit obligation to the bank.

The bank holds collateral against advances to customers in the form of mortgage interests over property or other registered securities over assets and guarantees. Estimates of fair value are based on the value of collateral assessed at the time of the advance and are updated for commercial property and residential property supporting a revolving facility which are assessed on a three-year interval based on independent valuations. In other instances collateral is re-assessed when an advance is individually assessed as impaired. Collateral is generally not held over advances to banks. Financial assets classified as neither past due nor impaired are well diversified with 65% invested in property transactions, 17% in instalment sale transactions (equipment and motor vehicle) and 18% in trade finance transactions. All of the above exposures are collateralised in the form of property, assets, personal sureties and company guarantees. The maximum exposure to credit risk is calculated as being the maximum amount payable by customers, banks and other financial institutions (refer to note 29).

	Group and Company	
	Credit Exposure 2012 R'000	Collateral cover 2012 R'000
Collateral is held specifically in respect of advances and these predominantly comprise mortgage bonds over fixed property, notarial bonds over moveable property, cessions over cash deposits, insurance policies, book debts and unit trusts, as well as personal sureties and company guarantees.		
Collateral is allocated per asset class as follows:		
Standard Asset	**2 500 565**	**2 072 407**
Special Mention Asset	**177 272**	**193 436**

2.2 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate resulting in losses due to movements in observable market variables such as profit rates, exchange rates and equity markets. In addition to these and other general market risk factors, the risk of price movements specific to individual issuers of securities is considered market risk. Al Baraka Bank's exposure to market risk is limited in that the bank does not trade in marketable securities other than those that it is required to hold for liquid asset purposes, which are usually held to maturity and foreign currency, held in terms of its foreign exchange licence.

The bank's exposure to market risk at year end is tabled below:

		Group and Company	
		2012	2011
		R'000	R'000
Assets held under interest rate risk	- Treasury bills	**64 656**	53 691
Assets held under exchange rate risk	- Foreign currency held	**1 860**	1 356
		66 516	55 047

In accordance with Islamic banking principles, the bank does not levy interest on finance provided and is, therefore, not exposed to interest rate risk.

2.3 Equity risk

Equity risk relates to the risk of loss that the bank would suffer due to material fluctuations in the fair values of equity investments. Equity risk in the case of Al Baraka Bank, relates to its 100% investment in Albaraka Properties Proprietary Limited, a property-owning subsidiary, which sole assets are properties held in Athlone (Cape Town) and Kingsmead (Durban). In addition the bank owns 9,4% in Kiliminjaro Investments Limited, a property holding company which owns a property in Durban. The fair values of the underlying properties are obtained by an independent valuation on a periodic basis and compared to the cost of these investments to identify any need for impairment. The bank also has an investment in unit trusts which is classified as fair-value-through-profit-or-loss and is subject to regular monitoring by management and the board, but is not currently significant in relation to the overall results and financial position of the group.

2.4 Liquidity risk

Liquidity risk relates to the potential inability to repay deposits, fund asset growth or to service debt or other expense payments.

Liquidity risk is managed mainly by ensuring that the funding of the bank is sourced from a wide range of retail deposits with an appropriate spread of short, medium and long-term maturities. Exposure to large deposits is strictly controlled. ALCO monitors and reviews the maturity profiles of the bank's assets and liabilities on a regular basis to ensure that appropriate liquidity levels are maintained to meet future commitments.

The bank also has a policy of maintaining liquidity buffers (in the form of Treasury Bills and cash surpluses held on call) comfortably in excess of regulatory requirements. Refer to note 29 for details relating to liquidity risk management.

2.5 Profit rate risk

The bank is not exposed to interest rate risk. In keeping with Islamic banking principles, the bank does not levy interest on finance provided to debtors, but instead earns income either by means of buying the item to be financed from the supplier and on-selling the item to the bank's clients at an agreed mark-up or by entering into arrangements with the debtor in terms of which the bank shares in the profit generated by the debtor at an agreed profit sharing ratio. In a similar fashion, the bank's depositors do not earn interest on deposits placed with the bank, but instead earn income on their deposits based on their proportionate share of the profits earned from customers by the bank. There is no mismatch in terms of the earning profile of depositors and that of the bank. As the mark-up and profit sharing ratios are fixed, the bank is not subject to the risk of fluctuations in the fair value or cash flows as a result of these instruments.

2.6 Shariah risk

Shariah risk relates to the possibility that the bank may enter into or conclude transactions that may not be compliant with Islamic banking principles. It also relates to the risk of non-compliance with the Accounting and Auditing Organisation for Islamic Financial Institutions (AAOIFI) Standards, to which the bank subscribes. In this regard, Shariah risk is closely linked to and embraces the following risks:

- Reputational risk;
- Profit rate risk;
- Liquidity risk; and
- Market risk.

Shariah risk is managed by monitoring, reviewing and supervising the activities of the bank to ensure that Shariah procedures, as prescribed by the Shariah Supervisory Board, are implemented and adhered to. The bank seeks to manage and minimise its exposure to Shariah risk by ensuring that the following measures are effectively implemented:

- The employment of adequate resources to manage and effectively mitigate, to the fullest possible extent, risk which could compromise Shariah compliance;
- Shariah reviews are carried out appropriately, and in a timely manner in accordance with Shariah Supervisory Board policies and plans;
- Confirmation that profits earned from clients and profits paid to depositors are strictly in accordance with Shariah principles;
- Profit distribution is managed by the bank in accordance with Shariah guidelines, as defined by the Shariah Supervisory board;
- Obtaining written Shariah Supervisory Board approval prior to the implementation of any new product or service and any proposed amendment to an existing bank product;
- The disposal of non-permissible income in terms of Shariah Supervisory Board rulings;
- The effective management and/or investment, in a Shariah-compliant manner, of excess liquidity; and
- The employment of a programme of continuous update by the bank of new developments, changes and amendments with regards to AAOIFI Shariah Standards.

2.7 Operational risk

Operational risk refers to those risks that do not have a direct financial impact as opposed to the pure financial risks, such as credit risk, liquidity risk and profit rate risk. Operational risk is the risk of loss that could arise as a result of breakdowns in internal controls and processes, system inefficiencies, theft and fraud.

The bank seeks to minimise its exposure to operational risk by various means, including the following:

- The establishment of an independent compliance function to monitor compliance with relevant laws and regulations and to facilitate compliance awareness within the bank;
- The establishment of board and management risk committees;
- The establishment of an independent internal audit function;
- The compilation of board-approved delegated powers of authority;
- The compilation of a policies and procedures manual;
- The provision of staff training (including fraud awareness programmes) and ensuring that staff are well versed with the bank's policies and procedures;
- Implementing comprehensive security measures to protect the bank's staff and to safeguard the bank's assets; and
- The establishment of a comprehensive insurance programme to protect the bank against material losses that may arise.

2.8 Compliance risk

Compliance risk refers to the risk that the bank could be exposed to for non-compliance with statutory, regulatory and supervisory requirements. These risks are addressed in the compliance report.

2.9 Other risk

Other risk relates to the bank's investment in fixed, moveable and other sundry assets.

Carrying value	**98 655**	100 435	**73 008**	79 017
Land and buildings comprise the following commercial properties as described below:				
1. Commercial property in Cape Town described as Erf no. 33983 Cape Town in extent 610 square metres independently valued at R9,8 million in 2010. The property is leased partly to the bank and partly to third parties. The leases contain an initial non-cancellable period of three years. Commercial property comprises land and buildings at cost.	**3 655**	3 655		
2. Commercial property in Durban described as Portion 6 of Erf 12445 Durban, Registration Division FU, Province of KwaZulu-Natal, in extent 3 316 square metres. The property is leased to the bank. The lease contains an initial non-cancellable period of ten years. The property was independently valued at R100,4 million in 2012. Commercial property comprises land at a cost of R3,5 million (2011: R3,5 million) and buildings thereon at a cost of R69,1 million (2011: R69,1 million).	**72 582**	72 582		
3. Land and buildings held under finance leases comprise Portion 6 of Erf 12445 Durban, Registration Division FU, Province of KwaZulu-Natal, in extent 3 316 square metres. The property is measured at the present value of the minimum lease payments and is fully depreciated over the period of the lease. In determining the fair value of the property, the minimum lease payments were discounted taking into consideration an unguaranteed residual of R72,0 million (2011: R72 ,0 million) and calculating a rate intrinsic in the lease 14,3% (2011: 14,3%).			**50 051**	54 280

Investment properties are only applicable at a group level and comprise the following land as described below:
Land in Durban described as Portion 4 of Erf 12445 Durban, Registration Division FU, Province of KwaZulu-Natal, in extent 2 140 square metres and Portion 5 of Erf 12445 Durban, Registration Division FU, Province of KwaZulu-Natal, in extent 1 528 square metres. The group has no restrictions on the realisability of its investment properties and no contractual obligations to purchase, construct or develop investment properties or for repairs, maintenance and enhancements.

	Group		Company	
	2012	2011	**2012**	2011
	R'000	R'000	**R'000**	R'000

The group carries investment properties at historic cost less provision for depreciation and impairment. The cost of the properties was considered to be equal to their fair value at the time of acquisition. The investment property was independently valued at R11,4 million as at 31 December 2011.

At the end of the 2011 financial period, capital expenditure was incurred to facilitate the generation of future income by the property. These costs were brought into use during the 2012 financial period, resulting in the depreciation charge depicted above.

The issued share capital of Albaraka Properties Proprietary Limited comprises 100 shares of R1 each (2011: 100 shares of R1 each).		
Shares at cost	*	*
Due by subsidiary	**22 903**	15 045
- Amounts owing by subsidiary	**92 609**	83 097
- Finance lease liability (note 30.3)	**(69 706)**	(68 052)
	22 903	15 045

* Amount less than R1 000.

The amount due by the subsidiary is profit-free.

The balance of the finance lease liability has been set off against the balance on the loan account as the bank has a legally enforceable right to set off these amounts in terms of the lease contract and intends to realise the asset and settle the liability simultaneously. The remaining balance is repayable on demand.

	2012	2011	**2012**	2011
	R'000	R'000	**R'000**	R'000

7. Deferred tax asset

	Group 2012 R'000	Group 2011 R'000	Company 2012 R'000	Company 2011 R'000
Balance at beginning of year	**3 019**	5 831	**8 755**	9 578
Transfers to profit for the year	**(2 864)**	(745)	**1 005**	3 033
Recognition/(derecognition) of temporary differences arising on finance lease			**3 856**	(3 856)
Reversal of impairment/(impairment) of accumulated tax credits in subsidiary	**2 067**	(2 067)		
Balance at end of year	**2 222**	3 019	**13 616**	8 755

The deferred tax asset comprises the following:

	Group 2012 R'000	Group 2011 R'000	Company 2012 R'000	Company 2011 R'000
Temporary differences arising on finance lease			**1 647**	3 856
Recognition/(derecognition) of temporary differences arising on finance lease			**3 856**	(3 856)
Deferred tax on accumulated tax credits in subsidiary	**2 458**	3 190		
Impairment of accumulated tax credits in subsidiary	**-**	(2 067)		
Temporary differences on financial assets	**(243)**	56	**(243)**	56
Impairment for doubtful advances	**1 198**	1 326	**1 198**	1 326
Other provisions	**11 665**	9 280	**11 684**	9 300
Prepaid expenses	**(139)**	(100)	**(133)**	(93)
Intangible assets, plant and equipment	**(12 717)**	(8 666)	**(4 393)**	(1 834)
	2 222	3 019	**13 616**	8 755

The expected manner of recovery of the deferred tax asset will be through the use thereof at tax rates applicable to companies at the time of such recovery. The temporary differences that arose on the finance lease between the bank and its subsidiary were derecognised in the prior period due the intended dissolution of Albaraka Properties Proprietary Limited. These temporary differences were recognised in the current year as Albaraka Properties Proprietary Limited returned to a going concern status and is therefore expected to generate sufficient future taxable profit to realise the deferred tax asset.

Further to this, the deferred tax asset created by the accumulated tax credits in the bank's subsidiary, which was impaired by the group in the prior year, was recognised in the current year to the extent that it is probable that the asset will be recovered through future taxable profits.

8. Investment securities

8. Investment securities (continued)

The bank's investment in unit trusts comprise 415 053 units (2011: 409 055 units) in the Old Mutual Albaraka Equity Fund. The cost of this investment is R5,3 million (2011: R5,2 million) and has been designated as a fair-value-through-profit-or-loss financial instrument on initial recognition. The investment is treated in this manner in order to eliminate any potential recognition inconsistencies that may arise on changes in the fair value of this instrument, had the instrument been classified on an alternate basis. The fair value of this investment is determined by quoted market prices and changes in fair value are recorded in profit or loss for the year.

Kiliminjaro Investments Limited is a property owning company of which the bank owns 9,4% (2011: 9,4%). The investment is classified as an available-for-sale financial instrument which is measured at cost, due to the fair value being indeterminable as there is no active market for unlisted shares of this nature.

The maturity of the deposit products offered by the bank range from current to 720 days. As such, amounts reflected as more than 5 years are representative of funds held as an investment risk reserve for the benefit of the total depositor pool. These funds are reserved for the protection of depositor monies should the need arise.

18. Income paid to depositors

Income paid to depositors is based on the profit sharing ratio agreed upon between the depositor and the bank at the time of the initial investment. On maturity, this income is either paid out to the depositor on instruction or reinvested on the depositors' behalf within the category of the initial deposit.

29.5 Market risk				
The exposure to market risk is as follows:				
Investment securities - fair-value-through-profit-or-loss	**6 119**	4 976	**6 119**	4 976
Investment securities - available-for-sale	**2 600**	2 600	**2 600**	2 600
	8 719	7 576	**8 719**	7 576

29.6 Intrinsic rate risk

Loans and borrowings subject to intrinsic rate risk

	Intrinsic rate	Maturity	Company 2012 R'000	Company 2011 R'000
Current portion – less than 12 months			**8 179**	68 052
Non-current portion – greater than 12 months			**61 527**	-
Total obligations under finance leases (note 30.3)	**14,3%**	**2024**	**69 706**	68 052

Intrinsic rate risk is limited to the finance lease between the bank and its wholly-owned subsidiary. The total value of the finance lease liability has been classified as current in the 2011 financial year due to the intended dissolution of the subsidiary in that year.

29.7 Accounting classification and fair values

The fair value of assets in the group and company are not materially different and thus only group disclosures have been presented.

Fair value of financial assets and liabilities not carried at fair value

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the financial statements.

Financial instruments for which fair value approximates carrying value

For financial assets and financial liabilities that have a short-term maturity (less than three months) it is assumed that the carrying amounts approximate their fair value. This assumption is also applied to demand deposits and savings accounts without a specific maturity.

Fixed rate financial instruments

The fair value of fixed rate financial assets and financial liabilities carried at amortised cost, are estimated by comparing market profit rates when they were first recognised, with current market rates for similar financial instruments. The estimated fair value of fixed profit bearing deposits is based on discounted cash flows using prevailing money-market profit rates for debts with similar credit risk and maturity. For those notes issued where quoted market prices are not available, a discounted cash flow model is used, based on a current profit rate yield curve appropriate for the remaining term to maturity and credit spreads. For other variable rate instruments, an adjustment is also made to reflect the change in required credit spread since the instrument was first recognised.

Set out herein is a comparison, by class, of the carrying amounts and fair values of the bank's financial instruments that are not carried at fair value in the financial statements.

29.8 Fair value hierarchy

The fair value of assets in the group and company are not materially different and thus only group disclosures have been presented. The group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The following table shows an analysis by class of financial instruments recorded at fair value by level of the fair value hierarchy:

	Level 1	Level 2	Level 3	Total
	R'000	R'000	R'000	R'000

	R'000	R'000	**R'000**	R'000
30. Leases				
Operating leases				
30.1 Leases as lessee				
Non-cancellable operating lease rentals payable are as follows:				
Less than one year	**1 761**	1 301	**2 038**	1 429
Between one and five years	**233**	955	**539**	955
	1 994	2 256	**2 577**	2 384

The rentals disclosed above relate to the leasing of commercial premises, occupied by retail and corporate branches of Albaraka Bank Limited. These leases have an average life of between one and three years with renewal options included in the contracts. The inter-group operating lease rentals payable have only been disclosed in the comparative year up to the anticipated date of dissolution of the subsidiary. With the termination of the dissolution, the current period's disclosure extends to the expiration of the lease contracts. Operating lease rentals are accounted for on a straight line basis over the period of the lease.

	Group		Company	
	2012	2011	**2012**	2011

Present value of minimum lease payments (note 6)	**69 706**	**69 706**	68 052	68 052

Albaraka Bank Limited has entered into a finance lease with its wholly-owned subsidiary, Albaraka Properties Proprietary Limited for the use of its property as the bank's corporate head office.

This lease is for an initial period of ten years with a five year renewal option. Rentals are escalated annually at 8%. No purchase option exists. Renewals are at the option of the bank.

Future minimum lease payments under finance leases together with the present value of the net minimum lease payments are stated above. The rate intrinsic in the lease is 14,3% (2011: 14,3%) after considering the unguaranteed residual value of R72,0 million (2011: R72,0 million) which will be realised at the end of the lease. The minimum payments have all been classified as current in the 2011 comparative period due to the intended dissolution of the bank's subsidiary.

31. Retirement benefits

Albaraka Bank Limited contributes to the Albaraka Bank Provident Fund, a defined contribution plan.

The Fund is registered under and governed by the Pension Funds Act, 1956, as amended. Employee benefits are determined according to each member's equitable share of the total assets of the Fund.

The company's contribution for the year was R2,0 million (2011: R1,9 million).

32. Change in accounting estimate

As part of the annual assessment of the remaining useful lives of property and equipment and intangible assets, it was ascertained that, based on the pattern of use of a major part of these assets, an extension to the estimated useful lives was required due to the economic benefits associated with these assets being utilised over a significantly longer period than initially estimated.

The reason for this extended life is closely associated with the regular maintenance, upgrade and repair of these assets as well as business decisions to prolong the use of these assets to the point where maximum benefit is gained from them.

The results of this assessment were treated as a change in accounting estimate in terms of IAS 8 – Accounting policies, changes in accounting estimates and errors. The effect on the current period's depreciation charge were reductions of R1,8 million on property and equipment and R0,6 million on intangible assets.

During the 2012 financial period, the bank conducted a Value Added Tax (VAT) review, based on the Value Added Tax Act, No. 89 of 1991, in order to identify potential VAT savings.

The review revealed that the bank had not applied the VAT legislation to its best advantage, specifically where technical and specialised interpretations were required, which resulted in the bank having under-claimed VAT to the value of R2,1 million over the period evaluated, comprising R1,3 million on revenue expenditure and R0,8 million on capital expenditure.

The additional VAT claim was accepted by the taxation authorities and the full refund was received in December 2012.

The results of the assessment were treated as a change in accounting estimate in terms of IAS 8 – Accounting policies, changes in accounting estimates and errors.

The revenue component of the refund is presented within operating expenditure (note 22).

The capital component is presented within property and equipment and intangible assets (note 3 and note 5) under the transfers line.

The capital component resulted in a revision of the depreciation charge for the year in the sum of R0,6 million, which is presented within the depreciation and amortisation line in note 3 and note 5 respectively.

33. Related party information

The holding company of Albaraka Bank Limited at 31 December 2012 is Al Baraka Banking Group B.S.C. which is a company registered in the Kingdom of Bahrain and which holds 62.2% (2011: 61.8%) of the company's ordinary shares.

DCD Holdings (SA) Proprietary Limited and DCD London & Mutual Plc, a company incorporated in England and Wales, jointly hold 12,6% (2011: 12,6%) of the company's ordinary shares.

The Iqraa Trust is a registered trust whose beneficiaries are charitable, welfare and educational institutions.

The trust is one of various beneficiaries of the bank's charitable activities. Four of the bank's directors are also trustees of the trust.

The subsidiary of the bank and the related inter-company balances are identified in note 6.

The property rentals paid to the subsidiary for the year amounted to R255 099 (2011: R255 099). The bank also made finance lease repayments amounting to R8 082 183 (2011: R7 483 503) for the year.

As the subsidiary does not maintain a physical bank account, all revenue and expenditure transactions are facilitated by Albaraka Bank Limited and are accounted for via the inter-company account.

The remuneration paid to the directors is disclosed in note 22.

The management fee charged to the subsidiary is disclosed in note 20.

Albaraka Bank Limited enters into financial transactions, including normal banking relationships, with companies in which the directors of the bank have a beneficial interest. These transactions are governed by terms no less favourable than those arranged with third parties and are subject to the bank's normal credit approval policies and procedures.

Directors are required to declare their interest in such transactions and recuse themselves from participating in any meeting at which these matters are discussed. Any transactions, irrespective of size, have to be reviewed by the board.

In order to avoid conflicts of interest and with a view to ensuring transparency at all times, a register of directors' interests in companies containing the nature of such interests, as well as the nature and extent of the beneficial shares held in the companies is submitted to the board of directors annually for reviewing and updating.

Balances owing by/(to) related parties, including loans to executive and non-executive directors, are disclosed herein:

	Company 2012 R'000	Company 2011 R'000
The total staff advances outstanding at the end of the period amounted to	**34 069**	27 200

34. Contingent liability

It was identified that certain contributions made by employees to third parties had been incorrectly classified by the bank. This could result in a possible obligation by the employees which the bank may bear. Discussions have been held by the bank and the relevant authority, as to how the obligation will be extinguished going forward and an independent tax advice has been obtained which supports the remedial actions proposed by the bank. Therefore the bank has determined that the likelihood of a future obligation materialising is not probable based on the information available at the date of the annual financial statements, and therefore no provision has been recognised. However it is possible that a further liability may arise.

35. Standards and interpretations not yet effective

	Effective Date
At the date of authorisation of the annual financial statements for the year ended 31 December 2012, the following accounting standards, interpretations and amendments were in issue, but not yet effective. These standards will be adopted at their effective dates, with no early adoption intended.	
IAS 27 Separate Financial Statements This revised standard is required for years commencing on or after 1 January 2013 and is not expected to have a significant impact on the current activities of the group.	1 Jan 2013
IAS 28 Investments in Associates and Joint Ventures This standard is required for years commencing on or after 1 January 2013 and is not expected to have a significant impact on the current activities of the group.	1 Jan 2013
IFRS 9 Financial Instruments The standard addresses the classification, measurement and derecognition of financial assets and financial liabilities. The effect of this standard on the group financial statements is in the process of being evaluated.	1 Jan 2015
IFRS 10 Consolidated Financial Statements This standard introduces a new single control model as the basis for consolidation applicable to all investees. It also introduces a changed definition of control. The effect of this standard on the group financial statements is in the process of being evaluated.	1 Jan 2013
IFRS 11 Joint Arrangements This standard establishes principles for the financial reporting by parties to a joint arrangement. The standard is not expected to affect the group financial statements.	1 Jan 2013
IFRS 12 Disclosure of Interests in Other Entities This standard combines, enhances and replaces disclosure requirements for subsidiaries, joint arrangements, associates and unconsolidated structured entities. The standard is not expected to affect the group financial statements.	1 Jan 2013
IFRS 13 Fair Value Measurement This standard applies when other IFRS require or permit fair value measurements. It defines fair value, sets out in a single IFRS framework for measuring fair value and requires disclosures about fair value measurements. The group will modify its disclosures accordingly.	1 Jan 2013
IAS 19 Employee Benefits This standard combines changes to the corridor method and expected returns on plan assets This standard is not expected to affect the group financial statements.	1 Jan 2013

	Effective Date
IAS 32 Offsetting Financial Assets and Financial Liabilities This standard was amended to clarify the meaning of "legally enforceable right". This is not expected to impact the group financial statements.	1 Jan 2014
IFRS 10 Transitional Guidance amendments and Investment Entities The amendments clarify that an entity is not required to make adjustments to the previous accounting for its involvement with entities if the consolidation conclusion reached at the date of initial application is the same when applying IAS 27 and when applying IFRS 10.This is not expected to have an impact on the group financial statements.	1 Jan 2013
IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine This applies to all types of natural resources that are extracted using the surface mining activity process. This standard is not expected to affect the group financial statements.	1 Jan 2013
IAS 1 Presentation of Items of Other Comprehensive Income The amendments to IAS 1 change the grouping of items presented in Other Comprehensive Income. This is not expected to affect the group financial statements.	1 Jul 2012
IFRS 1 First Time Adoption of IFRS The amendment clarifies the guidance relating to the repeat application of IFRS 1. This does not impact the group financial statements.	1 Jan 2013
IAS 1 Presentation of Financial Statements The amendment clarifies that comparative information in respect of the previous period forms part of a complete set of financial statements.	1 Jan 2013
IAS 16 Property, Plant and Equipment The amendment clarifies that servicing equipment is Property, Plant and Equipment when used during more than one period. This does not have an impact on the group financial statements.	1 Jan 2013
IAS 34 Interim Financial Reporting This amendment aligns the disclosure requirements in IAS 34 with those of IAS 8 Operating Segments. This is not expected to have an impact on the group financial statements.	1 Jan 2013

36. Adoption of new standards

	Effective Date
The following amendments to standards and new interpretations were adopted during the year, as they became effective for years commencing on or after 1 January 2012.	
IAS 12 Recovery of Underlying Assets	1 Jan 2012
IFRS 7 Transfers of Financial Assets	1 Jul 2011
IFRS 1 Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters	1 Jul 2011
